

## Counseling Department

### What is **Early Alert**?

Early Alert is a program designed as a timely intervention for students who are observed to be experiencing academic difficulty each semester. The program emphasizes collaborative efforts between students, their instructors, and faculty counselors. Often times, students just need a little help and do not know how to ask. This program alerts students that are in academic distress to seek assistance as needed in order to be academically successful.

Check out how the process works:
